

EXPERIENCE

KYOCERA

Reading, UK

Software Development Engineering Intern

Feb 2025 – present

- Spearheaded the refactoring of a mission-critical service portal, involving over 4,000 lines of legacy JavaScript/jQuery code, reducing technical debt by an estimated 60%.
- Drove adoption of a modern, componentized architecture, improving Developer Experience and enabling new features to be shipped by an estimated 30% faster by reducing complexity for onboarding team members.
- Implemented crucial code optimizations and actively resolved daily bug tickets, increasing system stability and improving the team's ability to onboard new developers to the codebase.
- Actively participated in an Agile workflow, contributing actionable technical feedback in daily stand-ups and cross-functional planning sessions.

EDUCATION

Reading College

Reading, UK

Digital Production Design and Development T Level

Expected Graduation, July 2026

- o **Concentrations:** Software Development
- o **Related Coursework:** Data Structures & Algorithms, Objects & Design, Programming, Object-Oriented Programming, HTML, CSS, JS.

Coursera

Reading, UK

Meta Introduction to Front-end Development

Completed, 2024

- o **Concentrations:** Frontend Development
- o **Related Coursework:** HTML, CSS, JavaScript, React, Git

Udemy

Reading, UK

Advanced React: Design System, Design Patterns, Performance

Completed, July 2025

- o **Concentrations:** Focused on advanced topics after skipping familiar content to prioritize deeper learning in performance and architecture.
- o **Related Coursework:** React, React Query, Architecture Pattern, Reusable Components Design, Custom Hooks, Performance Optimizations

EDX

Reading, UK

Harvard CS50X: CS50's Introduction to Computer Science

Completed, 2024

- o **Concentrations:** Programming foundation
- o **Related Coursework:** Data Structures, Algorithms, C, Python, SQL, JavaScript, HTML, CSS.

PROJECTS

Dimasc

Reading, UK

Team Member

April 2025 – July 2025

- Built major product features for a SaaS concept (Ads Analyzer, SEO assistant, analytics dashboards).
- Implemented robust CSV/JSON import tools and improved application performance/architecture.
- **Tech:** Next.js, TypeScript, Tailwind

Adlytix

Reading, UK

Primary Engineer

- Engineered a SaaS-like analytics platform for processing raw CSV/JSON ad data, **generating actionable insights across key metrics like Total Revenue, ROAS, and Impression scores.**
- Developed a full **secure authentication system** including MFA, OAuth integration, and multi-step recovery using **Supabase**.
- Designed dynamic dashboards and an analysis interface featuring **interactive charts** and secure PDF report generation.
- Built a highly scalable frontend architecture using **Next.js route groups** and managed state with **Zustand** and **React Hook Form**.

FVS Agency

Reading, UK

Team Member

Short-Term Project – May 2025

- Delivered a complete, production-ready **multilingual marketing website** (Home, Team, About, Projects) with responsive design.
- **Tech:** Next.js, TS, Tailwind

Dimasc AI

Reading, UK

Team Member

June 2025 - July 2025

- Built an internal AI Chatbot UI (homepage, settings, auth) using Next.js, designed for clean, scalable SaaS architecture.
- Used React Query for server state management and Zustand for global client-side state.
- **Tech:** Next.js, TS, Tailwind, Zustand, React Query

SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, Kotlin, Spring Boot

State & Tools: Zustand, React Query, React Hook Form, Git

Development Tools: WebStorm, Vercel, Netlify, IntelliJ, ESLint, Prettier
